Learn about a clinical trial for
Ulcerative Colitis

Have you been diagnosed with ulcerative colitis (UC)?

You may be able to join a clinical trial for people with moderately to severely active UC

What is the goal of this trial?

The goal of this trial is to learn if an investigational drug is safe and whether it may work compared to a placebo for people with moderately to severely active UC.

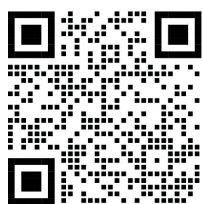

A placebo looks like the investigational drug, but has no active ingredients.

Can I join this clinical trial?

You may be able to join if you have UC. Trial staff will do tests to see if you meet the requirements to be able to join the trial.

To learn more about this trial, such as who can join, and the possible risks and benefits of joining, you can:

- Talk to your doctor
